Aludream ACP Panel

ALUDREAM® is a composite panel consisting of two aluminum cover sheets and a polyethylene (LDPE) core. The properties of this material offer architecture an inspiring new range of solutions – whether your project is a private home or a public building, corporate headquarters, office, or a trading/industrial complex – everything is possible with ALUDREAM®. Available in a wide range of colours. Our Aluminium Composite Panel is extremely rigid, yet can be formed into many shapes to suit any design.

It is also used extensively by organizations planning to create a new corporate design for retail chains, car showrooms, banks, petrol stations, etc.

Since the company was founded, the enterprise has been certified by ISO9001:2008 International Quality Management System, ISO14001:2004 International Environment Management System, OHSAS18001:2001 Occupation Health Safety Management System, and the products quality get approvals of CE, The products have been approved by SGS Fireproof Grade B1, and excellently approved by the sampling inspections by China Building Material Testing Center and China Quality Supervision & Testing Center, the Insurance Company PICC insure for our products. The quality and marketing of our products have been upgraded to a higher level.

Aludream! Choose us, Choose Future!

ABOUT US

ALUDREAM[®]

Manufacture of aluminum composite panel

Shanghai Aludream Building Material Co., Ltd is a diversified company integrating industry, trading, scientific research, investment and service. The company mainly produce **Aluminum Composite Panels**, Fireproof Aluminum Composite Panels, Advertisement and Signboard sheets, coated and mill finished Aluminum Sheets, Aluminum Ceilings and Roof, aluminum coil, Metallic finish insulation boards etc. The annual production capacity of over 12 million square meters. With the sales network spread domestic and abroad. such as North America, Australia, Southeast Asia, European Union, South American, Mid East etc. Our products have been widely used in the large and landmark constructions in China and the world, also are in sign industry, and have been greatly recognized by customers.

Full star rating

The screenshot displays the Alibaba.com supplier profile for Shanghai Aludream Building Material Co., Ltd. The profile features a 5.0 star rating with 1 review. The 'Supplier Service' section shows 5 stars for 'On-time delivery' and 'Product quality'. The 'Transactions' section shows a line graph of transactions over time. The 'Export Markets' section shows a bar chart of transactions by country. The 'Transaction Details' table lists shipping destinations, transaction values, and dates. The 'Feedback' section shows customer reviews and ratings.

Feedback

5.0

Very good quality and customer service

Great service and very good quality

High quality and cheap price ACP/ACM aluminum co.

Very helpful, on time delivery. Pleasure to do business with

PVDF coated 4mm 6mm alucobond aluminum

we are very happy with the product quality, product packaging and protection. aludream is a very helpful company to deal with and supplied extra shipment documentation upon request very fast. we look forward to dealing with this company moving forward, thank you

Quality assurance

From the material outsourcing to the production of semi-finished products and to the packaging and release of products, Technology is provided with the first-rate testing center of China for the control over every link to stop unacceptable products from flowing into the market.

MOQ: 50 sheets in one normal color if in stock, welcome to contact for inquiry.		

ALUDREAM COMPOSITION STRUCTURE

Composite panel has a three layer composite structure, The top and bottom layers are covered aluminum sheet. The middle core is low-density polyethylene. Panel is painted in colour of choice

Coating	PE/PVDF/Nano/FEVE
Protection film	OEM/Aludream/Neutral
Aluminum Skin	0.10/0.20/0.30/0.40/0.50mm
Middle Core	LDPE/B2,B1Fireproof/A2 FR
Back side	Primer/PE/PVDF
Can make Special Demand	

Aludream Aluminum Composite Panel Coating kinds

1.PE(polyester) Coating

PE coating is an UV-resistant coating. It can be classified matte and glossy according to coating gloss. The compact molecule structure makes paint surface luster and smooth, which assure good printing on the panel surface.

With an warranty of 8-10 years for weather resistance, it is specially applied for internal decoration, signage and shop front etc.

2. PVDF Coating

PVDF it is made of fluorine carbon resin, pigment, ester solvent, after high temperature roasting and baking, the paint is solidified to dry film with super weather resistance. PVDF coating also can be classified as traditional PVDF and nano PVDF coating.

①. **Traditional PVDF coating**, it is with KYNAR500 PVDF, two or three times for coating and baking, has good properties of anti-acid, anti-alkali and is durable in atrocious weather and environment, keeping 15 years no unwonted fading. In view of these facts, we recommend this panel applied for exterior wall cladding.

②. **Nano PVDF coating**, it is different with traditional PVDF is the clear coating. It contains nano element, which can protect panel from pollution, because nano has self-cleaning effect, It easy to get rid of dust and pollution by raining or water.

PVDF Coated ACP

3. Nacreous coating

Nacreous coating is formed by adding one more layer of nacreous paint on the basis of high-quality PE coating, and the surface glossiness is around 90° . The combination of glossy coating and nacreous coating makes the panel surface brilliant when the light irradiate on the panel. Premium material particularly applied to curtain wall construction, indoor as well as outdoor decoration, exhibition display, shop front, cabinet etc. It is an excellent choice for the places which highly demand the surface glossiness. The weather resistance tenor is eight to ten years.

4. Other Special colors coating

- ① Brushed panel. It has silver, gold, brown brushed etc.
- ② Granite panel.
- ③ Mirror finish panel. silver, gold and black mirror are popular.
- ④ Wood finish panel.

Product Features

1.ECONOMY

With the use of quality coating, aluminum-plastic panels are dispensed with longtime maintenance, thus having saved the maintenance expenditures of modem high-rise constrictions. Due to the serious pollution in cities in our country, they may need to be maintained and cleaned several years later. Being easily cleanable, they can be cleaned by neutral cleaning agent and clean water, and come out to be fairly new after cleaned.

2.DURABILITY

Fluorocarbon coated aluminum plastic composite panels are featured by high durability,good resistance against weather,high temperature,wear and pollution etc.

3.FLATNESS

Aluminum plastic composite panels are given smooth surface to meet the top-grade enjoyment of modem constructions.

4.LIGHT WEIGHT

Aluminum plastic composite panels are composite of aluminum and plastics,which is lighter than other decorating materials,thereby to facilitate the installation work and shorten the construction period.

5.EASYINSTALLATION

Aluminum plastic composite panels can be easily cut,grooved,and bent into arc or right-angled shapes to meet the requirements of decoration.

6.NON INFLAMMABLE

The non inflammable external aluminum sheets offer protection to polyethylene core material,and cut off heat conduction in the initial stages of combustion,with flame resistance up to international standard.

7.DESIGN PERFORMANCE

If requested by customers,aluminum-plastic panels can be made to different colors.

8.ENVIRONMENTAL- FRIENDIY

No changes in surface coating,no pollution to the environment.

Technical Properties

Thickness		2mm	3mm	4mm	5mm	6mm
Aluminum skin	[mm]	0.20			0.50	
Weight	[kg / m ²]	2.60	4.0	4.68	6.55	7.60
